### **All Candidates Must:**

- Have a desire to learn and grow in a competitive consulting environment
- Have a strong ability to learn new concepts independently and quickly
- Work under pressure and achieve dynamic deadlines under limited supervision
- Be an independent thinker and self-motivated to provide superior & profitable customer service
- Possess excellent verbal and written communication skills
- Have the ability to ask questions and be aware of personal and technical limitations
- Have excellent computer and problem solving abilities
- Ensure project requirements are met in terms of schedules, budgets, and customer satisfaction

### **Responsibilities:**

- Organizing and maintaining project files
- Perform required tasks for design, review and conformance to building and design codes
- Maintaining customer relations
- Meet with customers on-site as required
- Holder of valid Ontario driver's license
- Assist in the day to day office responsibilities of a growing engineering firm

### **Skills and Experience:**

- 3-7 years structural design experience in steel, concrete and timber
- Bachelor's degree in Engineering
- Ontario Registered P. Eng. or E.I.T.
- Structural engineering of buildings and structures
- Design knowledge of concrete, steel and timber required
- Experience would be considered an asset in one or more of the following areas; structural engineering, construction, fabrication, fall protection, ICF, construction equipment, mobile cranes, aerial devices.

There is an attractive base salary and there are significant growth opportunities for the right candidates. The position is based in Tillsonburg, Ontario.
